DataSpider Servista Patch Release Information

Accompanied with kintone API Get Multiple Records API Offset Upper Limit

We want to inform you about the DataSpider Servista patch module release accompanied by kintone API Get Multiple Records API Offset Upper Limit. For customers who use the kintone adapter, please check the information below and make sure to apply the patch module by the upper limit application date that will be announced from Cybozu Corp.

- Detail -

1. **Applicable Products and Versions**
   - DataSpider Servista Advanced Server Package 4.0 - 4.2
   - DataSpider Servista Basic Server Package 4.0 - 4.2
   - DataSpider Servista Select 4.0 - 4.2
   - DataSpider Servista with Software Protection 4.1

2. **Impact Range**
   - kintone Adapter
      Get Record Process

3. **Impact Contents**
   Cybozu Corp. announced that the upper limit would be applied to the offset of the API Get Multiple Records API. If you are currently using the kintone adapter record obtain process to process more than 10,000 records, you will be unable to obtain records after 10,001th record.

4. **Future Support**
   4-1. Support Description
   We will be releasing a patch module that will fix the internal API to be able to obtain records that goes over 10,000 records with the kintone adapter.

   Release Scheduled Date: April 3rd, 2020

4-2. Requests

For customers who use the kintone adapter, please make sure to apply the patch module by the application date(*) that will be announced by Cybozu Corp. After the release date, you will be able to download it from myHULFT.

*As of now, Cybozu Corp. announced that the upper limit application is scheduled to be in July 2020.
