

December 18th, 2017

Dear Customers

Saison Information Systems Co., Ltd.
HULFT Division.

HULFT-WebConnect Emergency Maintenance Announcement

We plan to perform an emergency maintenance on HULFT-WebConnect as below.
We apologize for the inconvenience and thank you for your patience and understanding.

1. Summary

We will perform a security update for the database server and the application servers that are internally used by the HULFT-WebConnect service.

Note: This maintenance is performed in response to the announcement from the cloud service provider.

2. Schedule

From December 26th, 2017 (Tuesday) 20:30 to December 26th, 2017 (Tuesday) 21:30 JST (for 60 minutes)

3. Scope of Impact

You cannot use the following with HULFT-WebConnect during the maintenance:

- HULFT-WebConnect Management Console
- HULFT-WebConnect Data Transfer Site
- Functions to transfer files using HULFT-WebConnect Agent (hereafter called "Agent"), HULFT-WebConnect CLI, and Data Transfer Site to HULFT-WebConnect

Also, in some installation environments, Agent might be suspended without a retry of connection to HULFT-WebConnect. A retry of connection occurs after Agent is disconnected due to instantaneous disruption. When Agent is suspended during the time of the maintenance, please restart Agent.
