Solution

Integrate the on-premise data and cloud services with "kintone" by easy operation!

Solution overview

 **kintone** ×  **DataSpider® Servista**

"Kintone" is a business collaboration platform that allows everyone to create business systems easily without skill of programming.

The following needs are realized by combining "kintone" with DataSpider Servista.

- ◆ Data integration between kintone and on-premise system
- ◆ Synchronization of master data and kintone
- ◆ Import email attachments into kintone
- ◆ Data integration among different applications
- ◆ Data integration between Kintone and cloud Services
- ◆ No more new servers for data integration

Integrate the kintone app with various systems without programming
