Solution

Lite IoT Solution is combined with HULFT IoT and MotionBoard. Visualizing data of things in real time brings awareness to accelerate innovation. Simple and quick IoT solution from data transfer and visualization!

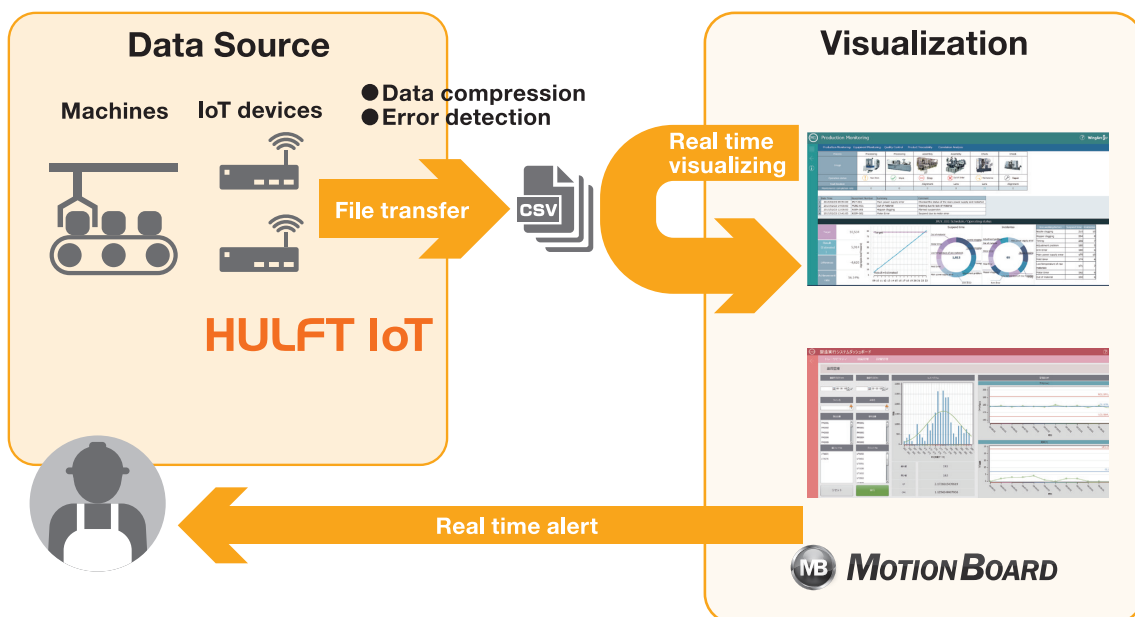

Solution overview

MOTIONBOARD × HULFT IoT

This IoT solution is combined with HULFT IoT and MotionBoard. The solution enables transferring data securely and reliably from IoT devices and allows for visualization and real-time monitoring.

Features of Lite IoT Solution:

- Guaranteeing data transfer prevents packet loss from IoT devices
- Automatic detection of network error reduces the workload of device operation management
- Data compression reduces communication cost
- Anyone in your organization can create dashboards without programming knowledge
- Real-time monitoring with threshold alerts to promote operational efficiency improvements
