Announcement of DataSpider Servista Patch Release Accompanying the Abolition of Amazon S3 Signature Version 2

We would like to inform you about the release of DataSpider Servista patch module accompanying the abolition of Amazon S3 signature version 2. If you are using an Amazon S3 adapter, please confirm the following contents and apply it by June 23rd, 2019.

- Detail -

1. Applicable Products and Versions

- DataSpider Servista Advanced Server Package 2.4.4 - 4.2
- DataSpider Servista Basic Server Package 2.4.4 - 4.2
- DataSpider Servista Select 2.4.4 - 4.2

*Include all service packs.

2. Impact Range

Amazon S3 Adapter

3. Impact Contents

AWS announced that signature version 2 in Amazon S3 would be discontinued on June 24th, 2019, and thereafter API request using signature version 4 would be required.

Since the Amazon S3 adapter currently being used is using the signature version 2, connection using this adapter will result in an error after the above date.

4. Future Support

4-1. Support Contents

Release the patch module updated for Amazon S3 adapter to make API requests with the signature version 4.

Release date : May 9th, 2019

HULFT

4-2. Request Items

Customers using the Amazon S3 adapter must apply the patch module before June 23rd, 2019. After the release date, it will be downloadable from myHULFT. Please refer to the bundled README for how to apply the patch module.

In addition, customers who wish to use the patch modules on the evaluation version, please be sure to fill in the necessary information and contact the address below after the release date.

Address: hultest@hulft.com
