

# Linkage among diversifying systems

Industry: Transportation/Airport

## HULFT

### Purpose of introducing HULFT products

Establish a seamless form of data integration among the diversifying range of systems as they are made open.

### Issues prior to introducing HULFT products

File transfer tools must be integrated each time there is an increase in data integration. This means there is a lot of effort involved in developing the tools, and a large number of work-hours in terms of operations such as processing before and after file transfer.

### Effect of introducing HULFT products

Files can be transferred securely and without problem. The automation of processing before and after transfer has led to significant improvement in operability.
