

Host accounting system: Sales management interface

Industry: Distribution/ Petroleum wholesale

HULFT

DataSpider® Servista

Purpose of introducing HULFT products

Receive sales data from the sales management systems of group companies and automatically create accounting journal data, thereby facilitating data linkage with the host accounting system.

Issues prior to introducing HULFT products

Format conversion of each sales data and import to Accounting system were done by manually. Therefore lots of human work is wasted and mistakes happened.

Effect of introducing HULFT products

Mistakes of data conversion or uptake were eliminated. It has resulted to improve operational efficiency significantly.
