

# Develop a data linkage infrastructure for making the transition to the EDI system

Industry: General

HULFT HULFT-WebFileTransfer

## Purpose of introducing HULFT products

Develop a data integration infrastructure designed to facilitate the transition to the EDI system.

## Issues prior to introducing HULFT products

The sending of purchase orders and invoices from the material order management system and suppliers' responses to delivery date was originally performed via email. This has caused security concerns and made operations inconvenient.

## Effect of introducing HULFT products

The "automatic and secure transmission of purchase order" and "real-time delivery confirmation" has become possible. As a result, ordering business has significantly speed up.
