

Partner

TT Techno Park Co., Ltd.

Solution

Realize improvement of business operation through seamless data linkage between cloud-type EDI and in-house core system.

Solution overview

HULFT 
WebConnect

GS-EDI * is a cloud-based EDI platform that unifies a wide variety of forms and data formats and standardizes ordering / logistics operations. It complies UN / CEFAC, based on the JAMA / JAPIA standard Toyota WG common EDI.

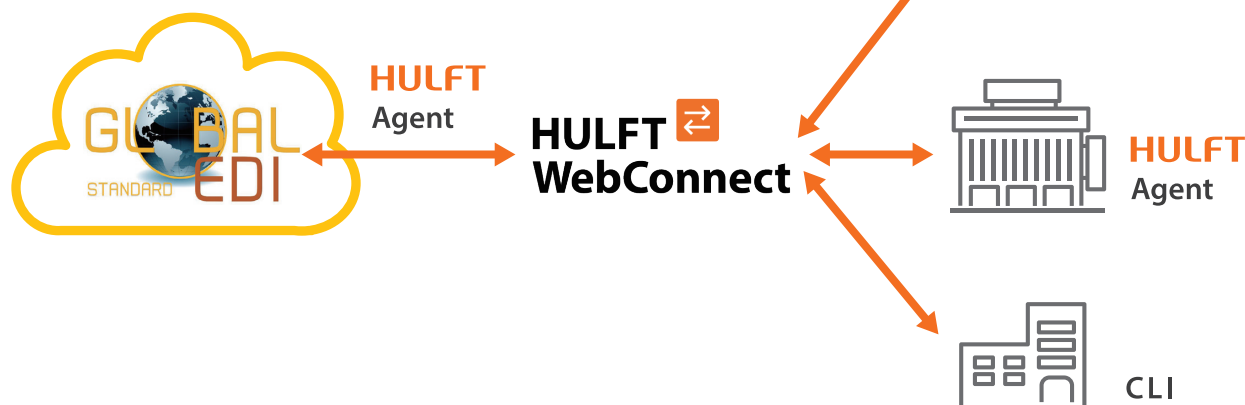

JAMA: Japan Automobile Manufacturers Association

JAPIA: Japan Auto Parts Industries Association

Features

- Information such as forecasts, orders, shipments, and acceptances can be exchanged between business partners in real time.
- Cost benefits unique to cloud-based EDI
- Supports maintenance and operation services
- Data linkage with in-house system can be realized with HULFT Webconnect (optional function)

Realize safe and secure linkage of cloud EDI and in-house system over the Internet

*GS-EDI is a service of Toyota Tsusho Corporation.
